

Inviting a fellow parishioner, member of your family or community leader is the only true way to achieve true grassroots activism. We're all busy in our lives, but the fact of the matter is that most people never get involved because they simply aren't asked. In fact, over 85% of those who do get involved in grassroots activism on one level or another do it simply because they are asked by someone they know.

Consider taking a moment to send an e-mail to someone you know inviting them to register for our e-mail action alerts and newsletters. You can do so confidently knowing that we never sell, lend, trade, or give away your e-mail addresses or any other contact information.

Please note that in order to protect against "phishing" or "spamming" there is no way to personally tailor your invitation. While it's a minor inconvenience, we're happy to have this important safety measure in place that protects both your computer and any friends' computers from potential hackers or identity thieves.

Thank you!
